Professional Summary

Data Analyst with a Master's in Data Science, Analytics and AI and a B.Com background in business and financial reporting. Proficient in Python, SQL, Power BI, and Advanced Excel — with hands-on projects spanning EDA, machine learning, and Streamlit dashboard deployment. Adept at turning raw data into clear business insights and communicating findings to both technical and non-technical audiences.

Technical Skills

Analytics & BI Tools: Power BI (DAX, Data Modeling), Advanced Excel (Pivot Tables, Power Query, VLOOKUP, What-If Analysis)

Programming & Databases: Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly), SQL (MySQL — Joins, Subqueries, Aggregations, Window Functions)

Data Analysis Skills: Data Cleaning, EDA, Statistical Analysis, Hypothesis Testing, Feature Engineering, KPI Development, Trend & Cohort Analysis

Machine Learning: Scikit-learn, XGBoost, Regression, Classification, Explainable AI (model interpretability for reporting)

Tools & Workflow: Jupyter Notebook, VS Code, Git, GitHub, Google Colab, Streamlit

Projects

HR Data Analytics Dashboard

[github.com/Musharraf-Bubere/Power-BI-Projects/tree/main/02 HR Data Analytics Dashboard](https://github.com/Musharraf-Bubere/Power-BI-Projects/tree/main/02%20HR%20Data%20Analytics%20Dashboard)

Power BI — DAX — Data Storytelling

- Analyzed HR data across 1,470 employees to measure a 16.1% attrition rate (237 employees), with breakdowns across education, age group, salary slab, job role, and years at company.
- Built 8+ interactive visuals including donut charts, bar charts, and a matrix table — revealing that Lab Technicians (62) and Sales Executives (57) had the highest attrition, and employees earning up to 5K had the highest attrition (163 cases).
- Created DAX KPI cards tracking average salary (6.5K), average age (37), and average tenure (7 years), enabling HR teams to monitor workforce health at a glance across 3 departments.
- Designed with department-level filters (HR, R&D, Sales) for self-serve analysis, eliminating the need for manual reporting by stakeholders.

Blinkit Sales & Customer Analytics Dashboard

github.com/Musharraf-Bubere/Blinkit-Sales-Customer-Analytics-Dashboard

SQL — Power BI — DAX — Data Modeling

- Integrated and modeled 8 CSV datasets (orders, customers, inventory, delivery, marketing, feedback) spanning 2023–2025 to build a unified 4-page analytical dashboard for Blinkit's business operations.
- Built a Sales Overview page tracking **Rs. 78M YTD revenue** with 4.64% YoY growth, breaking down performance by payment method, customer segment, and top 5 cities by sales value.
- Analyzed **12K+ customers** across total, new/lost, and repeat segments; identified 18K customers placing 10+ orders, enabling loyalty segmentation and targeted retention insights.
- Designed a Feedback Analytics page across **24,000+ ratings** and 4 feedback categories — revealing 69.8% positive sentiment and 102.31% order volume growth over the last 9 months.

Telecom Customer Churn Analysis & Prediction

github.com/Musharraf-Bubere/Telecom-Customer-Churn-Prediction-using-Machine-Learning

Python — EDA — Streamlit — Machine Learning

- Performed deep Exploratory Data Analysis on 7,000+ customer records to identify key churn drivers including contract type, tenure, and monthly charges.
- Engineered analytics-ready features and built visual reports to quantify churn risk by customer segment, enabling targeted retention campaigns.
- Trained and compared Logistic Regression, Random Forest, AdaBoost, and XGBoost; selected best model using precision-recall trade-off analysis.
- Deployed an interactive Streamlit dashboard providing real-time churn probability scores and customer-level risk summaries for business users.

- Analyzed behavioral engagement signals (click activity, active days, submission timing) to surface early academic risk patterns across student cohorts.
- Engineered 10+ analytical features from raw log data and visualized engagement trends to identify at-risk student groups before academic failure.
- Applied Explainable AI (feature importance) to make model output interpretable for non-technical stakeholders such as educators and administrators.
- Deployed on Streamlit Cloud with personalized risk scores and recommendations, designed for direct use by academic teams with no technical background.

Education

Master's in Data Science, Analytics & Artificial Intelligence IT Vedant — Private Institute Coursework: Statistics, Python, SQL, Power BI, Machine Learning, EDA	2025
Bachelor of Commerce (B.Com) MSCT, Neral — Mumbai University CGPI: 7.47 — Core: Business Analytics, Accounting, Financial Reporting	2021
Higher Secondary Certificate (12th) Maharashtra State Board Percentage: 70.31%	2018
Secondary School Certificate (10th) Maharashtra State Board Percentage: 67.60%	2016

Certifications

- **Data Analysis with Python** — IBM DA0101EN, powered by IBM Developer Skills Network (Nov 2025)
- **Machine Learning with Python** — IBM ML0101EN, powered by IBM Developer Skills Network (Nov 2025)
- **Python 101 for Data Science** — IBM PY0101EN, powered by IBM Developer Skills Network (Nov 2025)
- **AI + SQL Workshop** — Coding Ninjas in collaboration with Consulting Club, IIT Delhi
